Cartridges Fired in Oswald's Rifle

Three empty cartridge cases were found near the window from which the shots were fired on the sixth floor of the building. These cartridge cases were examined by the FBI Laboratory, and it was determined that all three had been fired in the rifle owned by Oswald.

(Exhibit 22)

Immediately after President Kennedy and Governor Connally were admitted to Parkland Memorial Hospital, a bullet was found on one of the stretchers. Medical examination of the President's body revealed that one of the bullets had entered just below his shoulder to the right of the spinal column at an angle of 45 to 60 degrees downward, that there was no point of exit, and that the bullet was not in the body.

An examination of this bullet by the FBI Laboratory determined that it had been fired from the rifle owned by Oswald. (Exhibit 23)

Bullet fragments found in the automobile in which President Kennedy was riding were examined in the FBI Laboratory. It was definitely established, from markings on two of the fragments, that they had been fired from the rifle owned by Oswald. (Exhibit 24)

Palm Print on Rifle

Dallas police lifted a latent impression off the underside of the gun barrel near the end of the foregrip of the rifle recovered on the
